

1. Find the execution flow for 2 more normative cases from the CFG file: equilateral triangle, and isosceles triangle.

EQUILATERAL[2,2,2]:

1->3 -> 4-> 5-> 6 ->7 ->8 -> 9 -> 10 -> 14 -> 15

ISOSCELES[2,2,1]:

1->3 -> 4-> 5-> 6 ->8 -> 10 -> 14 -> 16->17

2. Find the execution flow for 2 exceptional cases from the CFG file: invalid sides and violates triangle inequality.

INVALID[-1,2,4]:

1-> 2

Violates triangle inequality[2,3,8]:

1->3 -> 4-> 6 -> 8 -> 10 -> 11 -> 12
